## Epic Technology changes its name to Neoconix Incorporated

SUNNYVALE, December 18, 2004 – To truly represent the company’s focus on electrical interconnect solutions and the dramatic impact it is having on improving electronic system performance and cost, Epic Technology has changed its name to Neoconix, Inc.

Why the name change? Dirk Brown, Neoconix’s CEO explained, “Our identity has always been about the twin concepts of ‘new’ and ‘connection’. In an era where rapid and accurate information is critical, customers want to move beyond decades-old connector technologies to link cutting-edge applications. The \$35 billion connector industry is under tremendous pressure to innovate, and Neoconix is positioned to be a key driver of this innovation...”

Larry Dittmann, Executive Vice President of Business Development commented; “At Neoconix, we’re busy blazing the path of least resistance with pioneering technology that dramatically increases the performance of electrical interconnects. The time has come for these solutions, which allow applications to hit the market faster through flexible and cost-efficient product development.”

Leveraging a world-class engineering team and a strong technology base, Neoconix plans the release of several new interconnect solutions in 2005 that will dramatically impact the performance and cost of electronic systems. The company’s mission remains the same, to reinvent the interconnect industry – as embodied by its new name, Neoconix.

---

**About Neoconix:** Neoconix, Inc. blazes the path of least resistance between electronic devices with innovative interconnect solutions. Formerly Epic Technology, Inc., the company leverages proprietary technologies and unique manufacturing processes to deliver optimized electrical interconnection solutions that greatly improve the cost and performance of our customers’ electronic systems.
